## B. Project Description

### Project Overview

#### 1. Grant Category (check all that apply)

- Environmental Stewardship and Restoration
- Parks, Trails, and Public Access
- Environmental Education
- Urban Agriculture / Food Systems

#### 2. What type of project is this (check all that apply)

- Capital improvement
- Planning
- Program

#### 3. Project Location: Address

*If the project will be in multiple locations, please list all addresses. If there is no street address, please describe the area(s).*

Project Location 1: FACTR MAP project main office, 25 North 14th Street, Suite 505, San Jose, CA 95112. This location will hold most of the project administrative tasks.

Project Location 2: ACHI main office, 304 N 6th Street, San Jose, CA 95112. Mostly will hold classes and larger meetings

Project Location 3: California Native Garden Foundation, 79 Race St., San Jose, CA 95126. Project pilot gardening site.

#### 4. Project Location: Neighborhood

*If unknown, please enter "N/A."*

Santa Clara County

### 5. Project Location: OSA District (check all that apply)

A detailed map of the OSA Districts can be found under the Library tab, or online at <http://www.openspaceauthority.org/about/boardmap.html>.

- OSA District 1
- OSA District 2
- OSA District 3
- OSA District 4
- OSA District 5
- OSA District 6
- OSA District 7

### 6. Are there any project partners?

If there are project partners, please list each partner and describe their roles. Required - upload letter from each partner describing their role.

MAP is formed with close collaboration of the following organizations:

1. FACTR- as lead organization will take part in overseeing and coordinating the project as well as actively involving in the mindfulness practices conducting various classes, providing counselling and expertise in spiritual and mental fitness.
2. ACHI- will work with FACTR on the project management. ACHI will take part on healthy eating habits providing various nutrition and cooking classes to the participants of MAP.
3. CNGF- will host the demonstration garden. They are setting aside a section of their property for the MAP community garden development.
4. Core companies- will help transition the skill and knowledge developed at the initial phase to the permanent MAP site at the Agrohood/Win6 site.

Please also see the attached MOU showing the detail role of each of these partnerships.

### 7. Project Abstract

*(Brief, 3-4 sentences)*

The Mindful Aging Project (MAP) strives to improve immigrant elder health by utilizing a sustainable land use community garden to host several initiatives: a vegetable and healthy produce garden, a meditation garden, nutritional classes, and eco-mindful exercises. The common intention is to improve the mind, body, and spirit of each participant, while introducing them to sustainable gardening principles. They will be encouraged to disseminate these knowledge to the broader immigrant community.

## Community Engagement / Stakeholder Support (10 points)

---

### 8. Describe the community support and/or community engagement process.

*When applicable, the application should include letters of support from local jurisdiction(s), particularly for capital improvement projects. Please submit letters using the Documents Upload tab.*

The purpose of MAP is to inspire and educate the larger community on the methods of sustainable land use practices. The Project engages formerly isolated immigrant and refugee elders in the stewardship of natural resources and engages their extended families in the fruits of their agricultural production through harvest celebrations and farmer market sales. The elders grand-children will assist in planting and selling agricultural produce in the community, thus benefiting community consumers with their fresh, largely organic, produce. A Serenity garden designed with a collection of the immigrant elders' native cultural/ethnic/spiritual artifacts, and which will use Native-American plants and Native-American spiritual icons, as well, will be open to the public for sustainable land use education, inter-cultural education for inspiration, appreciation, and community harmony, community recreation and advocacy and awareness of diversity in cultures, communities and nature. MAP has strong community and stakeholder support. We have attached MOU (Memorandum Of Understanding) signed between FACTR, ACHI and CNGF showing their respective dedication and commitment to the proposed project. We have also attached a support letter from PARS organization showing the recommendation for the MAP project.

## Project Planning (20 points)

---

### 9. Describe the proposed project

Mindful Aging Project (MAP) is an initiative to bring immigrant elders from diverse communities together for socialization, personal well-being, greater serenity and health through community and meditation gardening activities. This project will use simple and practical approaches to address both elderly care and environmental issues. MAP will train and provide access to a

group of elderly immigrants each year, which will allow the participants completion to voluntarily involve in developing their own gardens in their neighborhoods individually or in group. The training integrating both holistic (physical, mental and social) health education and traditional community gardening principles will encompass teaching environmental sustainability, enhance Earth's life-support systems by bringing the participants to a closer connection with the Earth. The long term vision of MAP is to develop a self-sustaining multi-year commitment project with new yearly recruitments of qualified elderly immigrants for environmental stewardship and better quality of life and values.

MAP will focus on developing produce and serenity gardens initially at CNGF site and ultimately at the upcoming agrihood/Win6 villate site. The produce garden will help generate income for the participants and MAP project for its sustainability. The serenity garden will be used as a natural open platform for elderly population and their family to regularly social and provide support to one another. This open community garden is expected to demonstrate for the participants show their spiritual and cultural traditions and for the public to appreciate. Through this processes, the mission of MAP is for elderly population to find meaning, purpose, and a supportive community in their life, creating room for them to care for themselves in a mental, spiritual and physical manner while becoming earth stewards as well as extending their independence through their life time.

In addition, the project is based on partnership to effectively reachout to the immigrant community and successfully implement the project with solid foundation to be able operate independently by the participants of the program. At this initial and planning phase, the project will operate with full dedication and collaboration of The Family Alliance for Counseling Tools and Resolution (FACTR) and African Counsel Health Initiative (ACHI). Both FACTR and ACHI have initiated the Mindful Aging Project (MAP) and have been advocating for the project for several years during their long collaborative experience serving the low-income and immigrant population. After reviewing and understanding the concept of the project, both FACTR and ACHI were able to secure partnership from Californai Native Garden Foundation (CNGF) and core companies. CNGF will lead and guide on the design of garden of the proposed project as described above. Core companies will ultimately host the project on the upcoming Agrihood site as a permanent project site

#### **10. What is the lifetime of this project?**

*For capital improvement projects, applicants must state how long the project would remain on the site AND demonstrate that they have appropriate permissions. Please submit the Land Tenure form and documentation using the Documents Upload tab.*

- 5 Years (minimum for capital improvement projects)
- Other time period - explain:
- Perpetuity
- Not applicable

#### **11. Describe your plans for operating and maintaining the project over the next 10 years, and indicate your source of funds for ongoing management.**

*This question is required for all capital improvement projects. For planning and program projects, please answer if applicable, otherwise enter "N/A."*

For operating and funding the Project over the next ten years:

Adjunctive Interventions for Elder Immigrants in the MAP Project will assure funding for the project over ten years, including

- Farmers' Markets' micro-enterprise, facilitated by grandchildren of the Elder Immigrant Elder MAP participants;
- A percentage (10%) would go to MAP C-sponsors, FACTR and ACHI to help fund the ongoing MAP project
- Footprints Guild Activities and sales for elder immigrant members to help fund the ongoing MAP project: A percentage (10%) would go to MAP C-sponsors, FACTR and ACHI to help fund the ongoing MAP project
- Elder Storytelling and multi-cultural folktale sharing for children in the community and at schools- donations/ contributions by families attending will be sought
- Family Story Book Psycho-education services for Elder Immigrants and their grand-children; a legacy project of life lessons and cultural preservation for the benefit of grandchildren or younger generation family members of elder immigrants in the community; fees for this narrative story-collection service would be sought from families and adult children of elder immigrants from the community at large who wish to pass on their families' stories to younger members of their families.
- Family Story Book dramatizations and Theatre: donations/contributions by families attending theatrical events will be sought
- Serenity Garden Tours by the Community: A suggested donation for entry will be requested but not required
- Yoga and nutrition services will be offered to MAP participants free, but for other elders from the community, \$5.00 fees for each such group activity would be charged.
- Harvest fund-raisers for families and community
- Corporate fund-raising for transportation services and equipment
- Crowd-funding for on-going gardening activities, plants, materials and equipment.

#### **12. Describe the project's readiness for implementation.**

*Please include the status of any planning, design, or funding development necessary for project completion. This includes the status of CEQA compliance and any permits required for this project. REQUIRED: CEQA form, if applicable.*

A small scale of MAP have already started along the senior program of ACHI providing educational and socialization activities.

The MAP program will start as soon as initial funding is secured. At this initial stage, California Native Garden Foundation (CNGF) is willing to host MAP participants in their site to learn designing of produce and meditation gardens, and will assist them in completing the design of their gardens. CNGF has recently won a grant to build an outdoor restaurant with an outdoor kitchen where the nutrition classes will take place. The African Community Health Institute (ACHI) will host MAP participants to have nutrition and cooking classes.

FACTR has already identified the instructors for physical education and nutrition classes and is also well equipped with top notch clinicians to guide the participants to reach improved mental well-being.

After the initial piloted operation of MAP, MAP will be ready to transition to Winchester Boulevard at the Agrihood to continue implementing its activities in partnership with core companies. MAP participants will then be able to do many such activities independently at the Winchester site which is projected to be built in 2019.

## Project Budget (15 points)

---

### 13. Budget Summary

*This is a budget summary only; a detailed Project Budget must be submitted using the Documents Upload Tab. Please note: after the application is submitted, the software will automatically total all lines. This additional TOTAL will not be used.*

45,000	Grant request: Personnel
26,475	Grant request: Contracted Services
2,058	Grant request: Supplies/Materials
20,940	Grant request: Other Direct Costs
4,724	Grant request: Indirect Costs
99,197	TOTAL GRANT REQUEST
76,000	TOTAL MATCHING FUNDS
175,197	TOTAL PROJECT COSTS (grant request + matching funds)
43	PERCENT MATCH (matching funds / grant request)
449,634.00	<b>TOTAL</b>

## Project Goals (15 points)

---

### 14. Describe the specific problems, issues, or unserved needs the project will address.

The social goal of MAP is to bring elder refugees and immigrants from diverse cultures together for socialization while doing gardening activities in order to enhance health, prevent social isolation, and reduce depression. In today's political climate, the immigrant and refugee community is more vulnerable than ever. Tightening restrictions on immigration policy by the federal government, increased deportation raids, prolonged detention periods, and the rise of anti-immigrant sentiment in society are concerning factors in the lives of immigrants and refugees. Newcomers and their families face a variety of challenges. Socio-economic factors such as language barriers, maintaining their immigrant/refugee status, the ability to find meaningful work, safe and affordable housing, quality schools, pursuing an education, and raising families in a new culture are all important elements to consider when addressing the mental health and overall well being of the immigrant and refugee community. We believe there is a moral imperative to challenging indifference, overcoming prejudice, promoting diversity and developing compassion towards others within the community, for the benefit of all. As citizens we have an obligation to act humanely and compassionately toward vulnerable newcomer families while supporting the needs of people impacted by the most important humanitarian crisis of our times. The environmental goal of MAP is to educate elder refugees and immigrants to preserve the natural environment, maintain ecological integrity of the city of Santa Clara, safeguard water sources, preserve and restore natural plants and wildlife, plant native plants that use less water, encourage growing and eating healthy produce, and achieving healthy communities. The reason for this is that this segment of the population lacks this type of education and we feels that their lifestyle and community can benefit from this knowledge. It gives them a reason to come out into the community and upon learning new things, they can find pride in being able to share that knowledge with others.

### 15. Please list the project's goals (both social and environmental).

*These should be specific, measurable goals (e.g. 600 people participating in educational programs). Please see Appendix E of the Grant Program Guidelines for a list of sample goals.*

The specific goals of this project are:

1. To develop and reconstruct designated land for community gardens suitable for 40-50 immigrant seniors including space for health and meditation classes.
2. To provide environmental education and awareness while teaching basic gardening, and the role they can play as environmental stewards in the community.

3. To help elderly immigrants develop habits for healthy lifestyles through conducting nutrition, health, and cooking classes using the food grown at the garden
4. To initiate and integrate mindful lifestyle for elder immigrants by means of mindful gardening, yoga, meditation classes and counseling

## Impact (15 points)

---

### 16. Describe the lasting impact of the project.

The project will begin to directly and indirectly educate a segment of newcomers (i.e. immigrants) and their families to the need for conservation and sustainable land use practice, with the expected result that their own environmental resources footprint impact will be considerably reduced. By publicizing the project in ethnic newspapers and at ethnic community gatherings, the immigrant community will be brought in to a greater awareness of best practices for sustainable land use, for organic gardening and personal enjoyment. Thus, a relatively new community will be added to the pool of community stewards for the environment of the region. This project will be sustainable, environmentally friendly, unpolluted, water safeguarded, and disability friendly.

The project will demonstrate the benefits of community gardening, education in healthy eating and good nutrition, and mindfulness practices, where nature is a central component to the mindful practice, for formerly isolated and stressed elder immigrants, resulting in significantly improved health and greater sense of well-being for participants. By disseminating the resulting health benefits information to health professionals and immigrant service providers, it is expected that the project will be replicated in our region, the state and beyond, on behalf of refugee and immigrant populations, which now is a large swath of the region and state. The essential place of Vitamin "N" (for nature), for general well-being, and reducing "nature deficit", as Nature-for-Health Pioneer, Richard Louv describes it, will be reinforced for younger and older generations of immigrants alike!

In summary, We expect that MAP will be a powerful tool for elders

- Reduce stress and negative emotions by overcoming cultural change
- Develop a physical, emotional, and mental connection to the surrounding environment
- Increase a sense of "rootedness" while eliminating feelings of isolation and insecurity
- Empower individuals in finding comfort in community engagement
- Restore spirit and cultural pride

We hope to accomplish

1. Reduce senior immigrant isolation, disorientation, anxiety and reluctance , which often lead to severe health issues.
2. Perform pilot study for the effectiveness of connecting nature to the lifestyle of elders for their wellness, happiness and practicing mindfulness
3. Promote mind, body and spirit individually and in a group setting.
4. Increase awareness of elders and other community on use of community garden and its environmental benefits such as concerns on CO2 emission and pollution.

## Leadership & Innovation (10 points)

---

### 17. Describe how this project employs innovative approaches or encourages collaboration and partnership in the field of parks, open space, urban agriculture, land conservation, or environmental education.

MAP encourages collaboration and partnership in the field of urban agriculture, land conservation and environmental education. Though part of the project targets the mental, emotional and physical well-being of the participants, MAP brings out a segment of the population into an open natural space, to immerse themselves into working with the earth and learn to become stewards of our planet. They get an environmental education with MAP, that without it, they wouldn't and the knowledge they acquire is knowledge that the participants will be encouraged to share with their immediate communities. MAP teaches the concept of urban agriculture and the value of growing and eating fresh produce. Urban agriculture is something that most immigrants may not be familiar with and that will enhance their lives and their environment as they put it to practice on their own. The spaces that are chosen for the purposes of MAP are open spaces that are meant to stay as such, so in a way, you could say that MAP helps conserve open space. These spaces are designed to feed the soul, the body and beautify even further the existing space.

## Organizational Capacity (15 points)

---

**18. Briefly describe the organization.**

*Please include the year the organization was founded and its mission and goals. If the applicant is a Fiscal Sponsor, please describe both the APPLICANT and the SPONSORED ORGANIZATION.*

FACTR received 501c3 in 2009

Mission and Goals:

- FACTR is a service, research and training agency.
- Promotes the resilience and well-being of immigrants and refugees through counseling, advocacy, therapy, forensic services, educational workshops and opportunities for cultural exchange with the larger community.
- Works in partnership with ACHI (African Community Health Institute) to address the needs of elder immigrants through the development of the Mindful Aging Project

ACHI founded in 2005 received 501c3 in 2008

Mission and Goals

- Provide culturally and linguistically competent services
- Information and Referral service for African immigrants and refugees
- General health, nutrition and fitness and support programs
- Vocational and Career guidance (self-confidence development)
- Children/youth, women and senior special programs

**19. Describe the organization's ability to successfully implement this project. This might include successful past projects, staffing levels, financial resources, etc.**

*If applicant cannot otherwise demonstrate its capacity, expertise, and experience, please provide names and contact information of individuals knowledgeable about the organization's work.*

MAP is capable of successfully implementing this project as all staff members have previous experience in the past in serving elder refugees and immigrants.

FACTR

2011: Created the Cultural Exchange Fest meant to celebrate diversity: Created the Language Enhancement through Creativity Initiative which is a way of teaching language through improvisational theatre techniques.

2013: 3 C's Program, Culture, Compassion and Connecting Program, a Social and Emotional Curriculum, which teaches Preschool kids to appreciate other cultures and to develop connectedness in children for other cultures, in order to prevent bullying in public schools later on. Demonstration pre-school workshops occurred in Little Italy Kids, San Jose and Mandala Children's Center, San Jose, and at other venues. Immigration Hardship Center: a FACTR program that offers forensic mental health services, counseling, case management and community education. It provides psychosocial evaluations for legally stressed immigrants in such circumstances as deportation removal proceedings, Hardship Waiver applications, U-visa applications for victims of domestic violence, T Visa applications for human trafficking victims and asylum applications, and circumstances of incarceration of immigrants in the criminal justice system.

o FACTR provided a yearlong DACA (Deferred Action for Childhood Arrivals) community education program, funded by Silicon Valley Community Foundation, in partnership with Legal Aid Society, has forged alliances with non-profit legal agencies referring to FACTR.

o Member of Ready California: Organized by Immigration Law Resource Center of San Francisco

ACHI

2005-Present: Naturalization (Citizenship) training in three African languages 2009: Community education and engagement for educating child developments to the community under FIRST 5 funding (Awarded as best service providing agent of the year)

2009-2014: Language literacy ESL classes

2010: Alcohol and Tobacco prevention and education program forming alliance for the prevention of alcohol and Tabaco consumption

2013-15: Parenting Conference and workshops in collaboration with six organizations

2014-Present: Senior special program (self-development)

2015: Sewing for Women vocational education where about 18 women were trained with the help of volunteers how to sew for business.

2015: Public health education (cancer prevention for women and development of social support system)

The additional collaborating organizations on this project, Core Development Companies, California Native Garden Foundation, and Garden to Table, are very well established organizations, committed to the success of this project. Core Development Companies was awarded the bid by the City of Santa Clara to develop the Win 6 Village Project at the former BAREC Research Agricultural site of six acres, for affordable housing and sustainable land-use purposes.

**20. Briefly describe key staff members and volunteers' qualifications and experience relevant to the project.**

Project Director, Mehriban Mammadova has successful work experience providing counseling and case management to elder refugee and immigrants from Russian, Chinese, Spanish, Turkish, Azerbaijan, Georgian, and Armenian cultures.

Manna Teclemariam from Co-Sponsor ACHI has successful project experience teaching Nutrition and cooking classes to elder refugees and immigrants from African cultures and in administering her health education agency for African immigrants.

ACHI is a 501(c)3 agency has been serving the African refugee and immigrant community for ten years, and has a governing Board overseeing the work of the agency. ACHI has an ongoing program of health and nutrition education, socialization and citizenship preparation on behalf of refugees and immigrants from Africa.

Dr. Guang Yue Chen has successful experience teaching Tai Chi and Yoga to elder refugee and immigrants from diverse cultures and has a long-standing experience in the Health Field.

Karita Hummer, LCSW, FACTR President, Clinical Director and Chief Program Officer has fifty years of clinical experience in mental health, with a specialty in refugee and immigrant mental health. FACTR has been providing counseling, forensic mental health services, language enhancement education, community education and outreach and cultural programs including the Family Story Book Project and Footprints Guild for refugee and immigrant artisans and artists. CNFG team has strong team staff for leading garden development.

### **BONUS POINTS: Underserved Communities (10 points)**

---

**21. Describe how the project addresses open space needs for sensitive populations such as residents of park-poor neighborhoods, underserved or disadvantaged communities, youth, seniors, or is located within a Deep Engagement Community (DEC).**

*A map of the DECs can be found under the Library tab of online at <http://www.openspaceauthority.org/urban>. This question is optional; please answer if applicable, otherwise enter "N/A."*

MAP will serve underserved elders, senior refugees and immigrants from diverse cultures, who suffer from social isolation due to language barriers and the fear to move about independently in their new community. MAP will recruit such seniors and will bring them together for health, education, socialization and gardening activities, for healthy and sustainable land use type produce growing and meditation purposes. Without this project, the participants would have scant knowledge of sustainable land use methods, native plant use and organic and drought tolerant gardening. Their extended families will be indirectly exposed to the environmental concepts the elders will be learning and will benefit from their healthy organic produce in their homes. The project will be publicized broadly in immigrant ethnic communities. Thus, immigrant ethnic communities, of considerable size will gain a much needed, greater awareness about environmental needs and sustainable land use practices, for the greater environmental benefit of the whole region.

### **BONUS POINTS: Community Building (10 points)**

---

**22. Describe how this project actively encourages community building by engaging or accommodating local residents in novel and creative ways.**

*This question is optional; please answer if applicable, otherwise enter "N/A."*

MAP encourages its participants to be creative, produce native plants that use less water and conserves land for a worthy public purpose, at once giving elder immigrants a grounding and foothold in their relatively new community and literally making them stewards of their new environment, thus giving them greater purpose and adding them to the pool of community advocates for conservation and open space. The Project inherently encourages inter-change between the relative newcomer elders and the broader community through an invitation to join them in open house tours of their meditation garden and to learn about what the elders have accomplished in their two gardens. The inter-generational focus with an encouragement of the participation of the elders' adolescent grandchildren in the planting and care of the gardens and assistance in the sale of the grandparents' produce will instill pride, knowledge and new awareness of the environmental needs of the region in a second generation of immigrant youth. The elders will regain their rightful role in their families of imparting a love of nature and a wisdom about how to care for our natural habitat to their grandchildren, thus increasing their sense of contribution to future generations. By being part of Agrihood, Win 6 Village, the elders will be participating in a demonstration of best environmental practices for the whole region. In every sense of the phrase, this project is, at its core, a "community building" project.

### **BONUS POINTS: Leverage Funding (5 points)**

---

**23. Describe how the project leverages funding with more than 25% match by grantee (cash or in-kind).**

*This question is optional; please answer if applicable, otherwise enter "N/A."*

MAP will partner with several other agencies, development and environmental, to encourage urban agriculture, preserve open space, conserve water, and preserve wildlife, and will bring elder refugees and immigrants from diverse cultures to collaborate, grow and sell native plants and organic produce. MAP is a part of a highly innovative project, Win6 Village Agrihood project, which is reusing open space that previously had been dedicated to agricultural research, the BAREC 6 acre site on Winchester Ave, in the city of Santa Clara. The Agrihood space will integrate affordable housing and various sustainable land use practices that will be a model of land use for conservation and valuable community building purposes. Thus, the immigrant elders will be among the constituents who will benefit from this demonstration project that will likely get regional, state and national attention as a pioneering Agrihood-type project. The collaboration for MAP involves seven organizations who already have been working very actively in the conceptualization and design of the project. It is a multicultural project that combines the ideas, talents and resources of a team of leaders from the fields of ecology, health, design, social service, mental health, urban agriculture, the culmination of which will likely be a landmark and beacon for the value of such collaborative effort.

## C. Work Plan

### C.1. Project Work Plan

Task Number	Activities	Timeframe	Outcome/Deliverables
1	Intake, recruitment and Orientation	Months 1-2	Recruiting and preparing 50-60 participants
2	Community garden tours	Months 2-3	Increase commitment and interest of participant to the MAP project
3	Gardening instruction and support	Months 2-4	Develop skills for gardening
4	Garden development -Group formation, -Garden assignment, -Continues support	Months 2-12	Be able to grow sample produces and develop multi-culture serenity garden
5	Mindfulness Practices -Yoga and Tai Chi Classes -Recreation and Socialization	Months 2-12	Participants develop mindfulness practices for improving their quality of life
6	Healthy eating habits -Nutrition and Cooking Classes	Months 2-12	Participants develop healthy eating habits and understanding its impact
7	Intergenerational Engagement	Months 8-12	Participants able to make a difference on their community engagement and education
8	Micro-enterprise, Farmer market sales	Months 8-12	Participants develop skill for micro-enterprise and its capacity to fund future MAP projects
9	Evaluation and Reporting	Months 2-12	Successfully operation and completion of the project
