Milpitas, CA 95035

Subject: Santa Clara Valley Water District Permit 05446 Amendment

Dear Ms. Demers:

The Santa Clara Valley Water District (District) has reviewed your request to allow public tours of the bird banding activities.

District Permit 05446 is hereby amended to allow the supervised public tours of the bird banding operations conducted by the San Francisco Bay Bird Observatory. As an update to Special Provision 1 on the permit, a copy of the final report(s) presenting the results of the survey shall be sent to the District, attention to Mr. Scott Katric.

All general and special provisions associated with the previously issued permit shall apply for all identified improvements in addition to the following:

- Public tours shall not be conducted between October 15 and April 15.
- Permittee shall contact the District's Field Operations Unit, Don Duran, (408)265-2607 at extension 3034, at least 2 normal working days prior to conducting any public tours.
- No access will be allowed during or after storm events when the District's maintenance road is prone to damage. Before entering District maintenance roads, the permittee shall assess the structural condition of the maintenance roads to ascertain whether or not the roadway can support vehicles. Only if it is determined that the road material is sound can vehicular traffic enter District maintenance roads. If road damage occurs, the Permittee is required to report the damage to the District's Field Operations Unit, Don Duran, (408)265-2607 at extension 3034, within 48 hours of it occurring. Permittee shall submit a work plan and schedule outlining the repair measures to be installed within one week of damaging the road facility.
- Permittee shall take measures to reduce and minimize the number of vehicles and vehicular trips whenever accessing the District's flood protection facilities including but not limited to levee maintenance roads and turnaround areas.

A copy of this letter is to be kept with the original permit at the site.

Ms. Jill Demers
